

## TEST REPORT

**Testing laboratory:**

 Eurofins ERICo Slovenija, Inštitut za ekološke raziskave d.o.o.,  
 Koroška 58, 3320 Velenje  
 tel.: +386 3 898 1930, fax.: +386 3 898 1942

 Customer: Stark Projects Ltd., 16-18 Finch Drive, Springwood  
 Ind Estate, CM7 2SF Essex, UK

Sample description: Products from Industrial Hemp

Laboratory sample identity: R1-747/21

Sample name: Coffee Hemp 1000

Sampling site: Stark Projects Ltd.

Sampling performed by: Customer

Sampling date: 19.05.2021

Sample receiving date: 19.05.2021

**RESULTS:**

Parameter	Method	Result	Unit	Meas. Uncert. (MU in %)	Testing date
Total cannabidiol - CBD	internal method PM 4.57, 4 <sup>th</sup> ed	0.10	%	15	21.05.2021
Cannabidiol - CBD	internal method PM 4.57, 4 <sup>th</sup> ed	0.04	%	20	21.05.2021
Cannabidiolic acid - CBDA	internal method PM 4.57, 4 <sup>th</sup> ed	0.07	%	20	21.05.2021
Total tetrahydrocannabinol - THC	internal method PM 4.57, 4 <sup>th</sup> ed	<0.03	%	22	21.05.2021
Delta 9-tetrahydrocannabinol - D9-THC	internal method PM 4.57, 4 <sup>th</sup> ed	<0.03	%	22	21.05.2021
Delta 9-tetrahydrocannabinol acid - D9-THCA	internal method PM 4.57, 4 <sup>th</sup> ed	<0.03	%	22	21.05.2021
Delta 8-tetrahydrocannabinol - D8-THC	internal method PM 4.57, 4 <sup>th</sup> ed	<0.03	%	14	21.05.2021
Cannabinol - CBN	internal method PM 4.57, 4 <sup>th</sup> ed	<0.03	%	12	21.05.2021
Cannabigerol - CBG	internal method PM 4.57a, 1 <sup>st</sup> ed	#<0.03	%	/	21.05.2021
Cannabichromene - CBC	internal method PM 4.57a, 1 <sup>st</sup> ed	#<0.03	%	/	21.05.2021

# - the results are related to non- accredited activity

 Head of laboratory:  
 Matej Šuštaršič

**Notes**

Total tetrahydrocannabinol (Total-THC) is analyzed directly with gas chromatography (GC-FID).

 Total tetrahydrocannabinol –THC (total delta 9-tetrahydrocannabinol ) represents sum of delta 9-tetrahydrocannabinol ( $\Delta$ 9-THC) and decarboxylated delta 9-tetrahydrocannabinol acid ( $\Delta$ 9-THCA).

 Delta 9-tetrahydrocannabinol ( $\Delta$ 9-THC) is calculated, using the formula:

$$\text{Total } \Delta 9\text{-THC} = \Delta 9\text{-THC} + 0,877 * \Delta 9\text{-THCA}$$

Total cannabidiol is analyzed directly with gas chromatography (GC-FID) and represents sum of cannabidiol (CBD) and decarboxylated cannabidiolic acid - (CBDA).

cannabidiol (CBD) is calculated, using the formula:

$$\text{Total CBD} = \text{CBD} + 0,879 * \text{CBDA}$$

 Measurement uncertainty (MU) is estimated from the contributions of the uncertainty arising from the test methods and environmental conditions, as well as short-term contributions to the course of testing ( $k = 2$ ).

Uncertainty is evaluated in accordance with publication EA-4/16. Measurement uncertainty is given relative (in %) according to the given result.

Results of Test report relate only to the tested samples. A part of this Test report may be reproduced only with permission in writing from testing laboratory. Test report may be reproduced only in whole.
